# Profile SHP

### Squared timber

Thermally modified

For exterior and interior use

100% natural, reusable

High dimensional stability. long-lasting

#### Additional Features

# SQUARED TIMBER

## Technical data

Profile	SHP	m/m <sup>2</sup>	in pack m/m <sup>3</sup>
	34 x 34	29,40	865
	42 x 42	23,80	567
	42 x 68	14,70	350
	42 x 92	10,90	258
	42 x 117	8,55	203
	42 x 140	7,14	170
Species:	Scandinavian Pine		
Lenath:	18 - 51 m		

Thermal modification is a 100% natural method for increasing the durability and dimensional stability of wood, likewise for reducing water absorption. During the process, the wood is heated to a temperature of 180-220°C, while lowering the moisture content of the wood up to 4-6 %. Thermoarena conducts careful quality control of the wood before and after thermal modification. The lumber used for TM is checked and certified.

Please follow Thermoarena's installation instructions when working with thermal wood
