

# Profile DCLIP

## Decking with clips system

-  Thermally modified
-  For exterior and interior use
-  Use with CLIPS system rails and clips
-  Quick and easy installation
-  Long-lasting
-  100% natural, reusable
-  High dimensional stability

## Additional Features

Thermal modification is a 100% natural method for increasing the durability and dimensional stability of wood, likewise for reducing water absorption. During the process, the wood is heated to a temperature of 180-220°C, while lowering the moisture content of the wood up to 4-6 %. Thermoarena conducts careful quality control of the wood before and after thermal modification. The lumber used for TM is checked and certified.

## DECKING WITH CLIPS SYSTEM

### Technical data

Profile	DCLIP	Coverage m/m <sup>2</sup>	in pack m/m <sup>3</sup>
	26 x 117	8,13	328
	26 x 140	6,85	274
Species:	Scandinavian Pine		
Length:	1.8 - 5.1 m		

Please follow Thermoarena's installation instructions when working with thermal wood
